## Technical characteristics

Length	100 cm
Width	34 cm
Tiles per m <sup>2</sup>	7 pcs
Weight per m <sup>2</sup>	9,4 kg

Onduline 5 years warranty for waterproofing, valid if the product has been installed in full compliance with installation recommendations (more on [onduline.com](https://onduline.com)).

## Installation in few and easy steps

### Support and the 1<sup>st</sup> tile row

Installation is done on full wooden decking only (minimum 12mm thick, preferred thickness 18mm). A minimum of 12.5 degrees pitch is recommended. Prepare base course cutting length ways tile tabs. The eaves course is then bonded to the adhesive tabs of the base course. Use ONDUTISS membranes for enhanced breath-ability.

### Fixing

Use five 20 mm large headed galvanised nails per shingle. Nail through strip centre band and into the top edge of the lower course.

### Installation basic rule

If needed shorten the first left (or right) strip by half a tab. On completion check the tile bonding, use adhesive to reinforce laps as required.

### Ridge

To complete the ridge line, start always cutting shingles to make the ridge (see 4a). Make sure that the bitumen shingles are sufficiently covered on both sides of the roof. The direction of the overlap is made in the opposite direction to prevailing winds (see 4b). BARDOLINE detail strip can also be used for the ridge.

### Job completed

BARDOLINE® shingles provide an attractive, colored and long lasting finishing to a wide variety of garden buildings.

### CALCULATE THE PITCH OF YOUR ROOF

$$\text{Pitch (\%)} = \frac{h}{b} \times 100$$

Watch the video!

## Accessories

**BARDOLINE DETAIL STRIP**  
Available in matching colours with the roof shingles for seamless finish

**ONDUTISS AIR**  
Breathable waterproof membrane helps preserve the waterproofing of a roof. Ensure to use a membrane below BARDOLINE on pitches below 20 degrees.

GARDEN SHED
