ONDULINE EASYFIX® COMPACT

A large choice of colors

Technical characteristics

Length	100 cm
Width	82 cm
Corrugation height	38 mm
Weight per m ²	2,8 kg
Weight per sheet	2,26 kg
Surface	0,82 m ²
Net coverage surface	0,62 m ²

For a 10 m² Roof area: 16x sheets + 2x bags of screws

Onduline 10 years warranty for waterproofing, valid if the product has been installed with Onduline recommended accessories (Ridge, Verge, Fasteners) and in full compliance with installation recommendations (more on onduline.com).

Installation in few and easy steps

Installation is highly recommended on **full deck (OSB, plywood...)**.

A 21 mm thick minimum support is recommended. In case of discontinuous support, the span between purlins centers must be 28 cm. Minimum Pitch required: 15%. Plan to lay sheets in the opposite direction to the prevailing winds. **It can be installed on old asphalt Shingles.**

In average, 10 fixings minimum should be used per sheet.

- Always fix on the **top of corrugations, using Onduline® fixings** with special washer for safe waterproofing.

At eave and overlaps, it is particularly important to fix every corrugation. Fixing should be done in the right order and in between the two overlapping lines. Wait to fix the last corrugation until you overlap it with the next sheet.

! To avoid transversal cutting, You may increase overlap:

- 15 cm **standard overlap**
- **Increased overlap** to avoid cut

Optimise installation & avoid waste combining ONDULINE EASYFIX® COMPACT (1 m) with ONDULINE EASYFIX® (2 m).

Installation on full deck is also highly recommended.

On discontinuous support, **carefully watch the purlin spacing** for optimized durability of the roof.
